-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following invention is required under 35 U.S.C. 121:

I. Claims 1-9, and 16, drawn to method for determining an overall level of medical clinical conclusion, classified in class 706, subclass 8.

II. Claims 10-15 , drawn to method for evaluating a medical clinical conclusion, classified in class 705, subclass 2.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as method and apparatus for determining a confidence parameter of a medical conclusion by fuzzy logic and linear combination and invention II has separate utility as method and apparatus for evaluating a medical clinical conclusion by storing medical element and rule for associating the element with a clinical conclusion, receiving, , sequencing and segmenting a medical claim into chronological segments and determining a total membership confidence value for each segment with respect to the clinical conclusion based on the medical rule. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and the search for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
